

Ultra Linear and Trapezoidal Firestops

By **Tyne Insulation Supplies Ltd.**

Ultra Linear and Trapezoidal Firestops

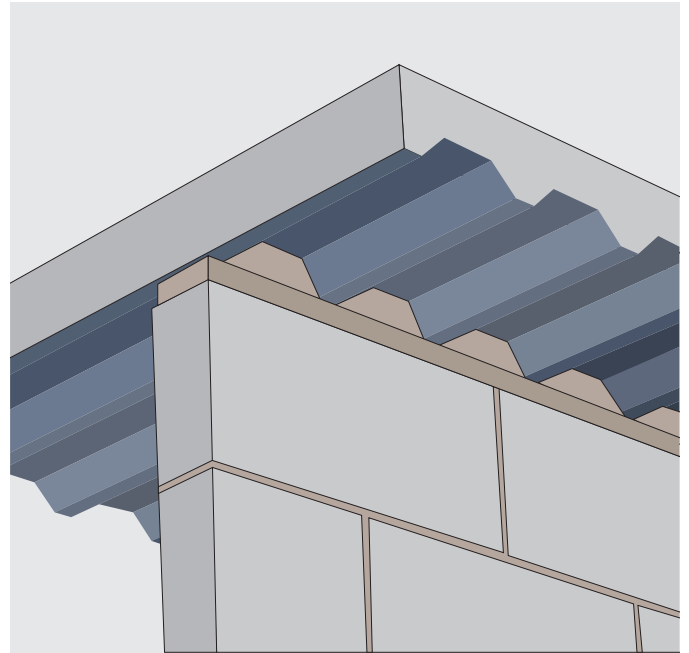

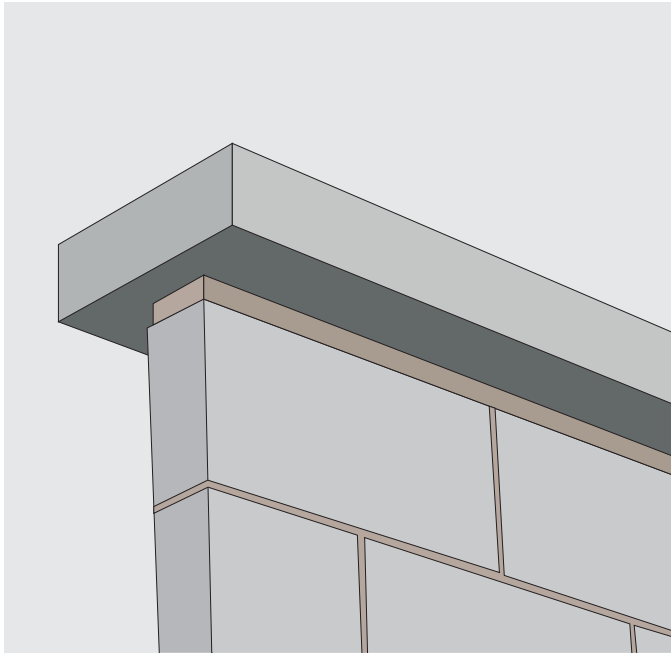

What are Ultra Linear and Trapezoidal Firestops?

Ultra Linear and Trapezoidal Fire Stops are designed to provide fire stopping at the junctions of compartment walls and floors. The products prevent the passage of smoke and flames through narrow gaps and are suitable for installation between soffits and the top of masonry or partition walls.

The product has been tested at Warrington Fire Research Centre in accordance with EN 1366-4 and achieves two hours fire integrity.

Ultra Trapezoidal Acoustic infills are bespoke tissue wrapped acoustic rockfibre fabricated to suit the profile of metal decking. The infills help with sound attenuation in profiled metal deck roofs.

Products

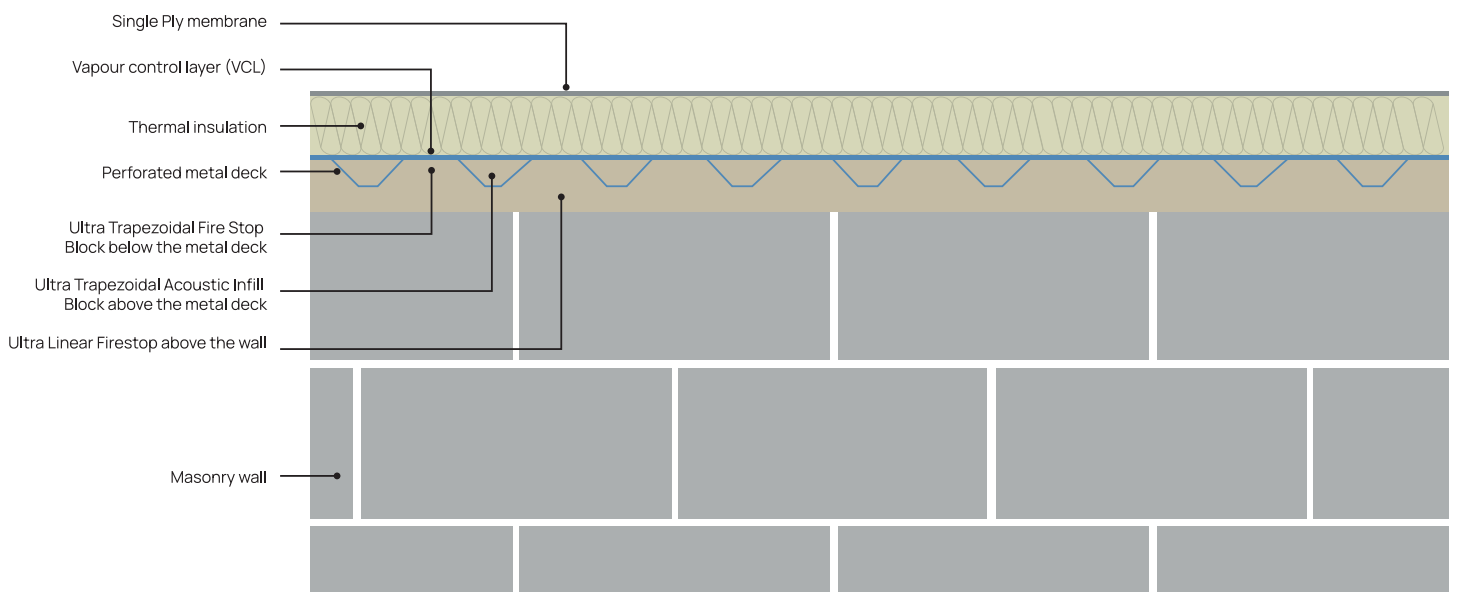

+ Ultra Linear & Trapezoidal Firestops

Ultra Linear and Trapezoidal Fire Stops are designed to provide fire stopping at the junctions of compartment walls and floors.

The products prevent the passage of smoke and flames through narrow gaps and are suitable for installation between soffits and the top of masonry or partition walls.

Fire Stop Blocks, Fire Stop Strips & Acoustic Trough Infills

Product Description

Ultra Linear Fire Stops	
Length	1200mm
Thickness to suit voids	10mm to 100mm
Widths available	100mm to 400mm

- Manufactured from non-combustible rockfibre mineral wool.
- Provides fire resistance of 120 min tested to BS 476 part 20 (Warrington Fire Research).
- Helps reduce room-to-room sound transmission.

Ultra Trapezoidal Fire Stops	
Length	75mm to 1200mm
Thickness	Bespoke to suit deck profile
Widths available	Bespoke to suit deck profile

- Manufactured from non-combustible rockfibre mineral wool.
- Helps reduce room-to-room sound transmission.
- Acoustic or thermal trapezoidal infills can be manufactured from other insulation materials.

Installation

- Product is friction fitted with minimum 5% compression.
- Joints are to be tightly butted.
- Prior to installation, remove excess rough masonry where practicable.
- No adhesive or mastic is required.

Environmental Properties

Ultra Linear and Trapezoidal Firestops offer no threat to the environment and have zero ozone depletion potential (ODP). The global warming potential (GWP) of the rockfibre insulation is zero.

How to order

We can deliver nationwide and lead times are 4-7 days. Ultra Linear and Trapezoidal Firestops are bespoke manufactured for each project. For prices and lead times please contact us with the product dimensions, quantity and delivery address. If you need any technical assistance please do not hesitate to e-mail or call us during office hours.

Interested in our firestopping solutions?

Please contact us by phone, e-mail or via the website and we look forward to being of assistance on your project.
